THE GEM: SEO Agency Light

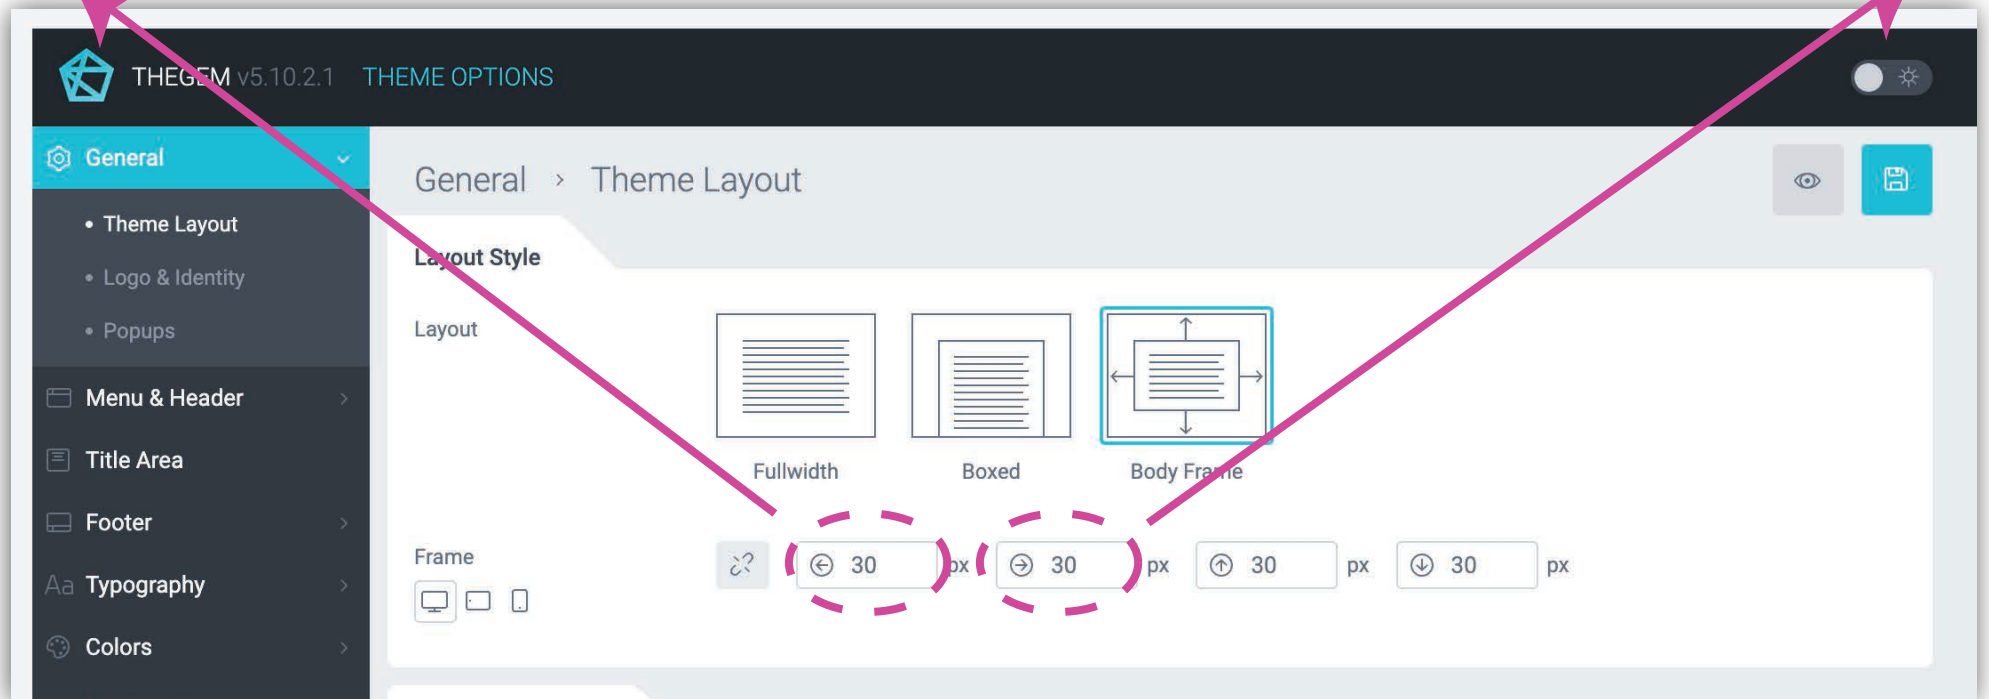

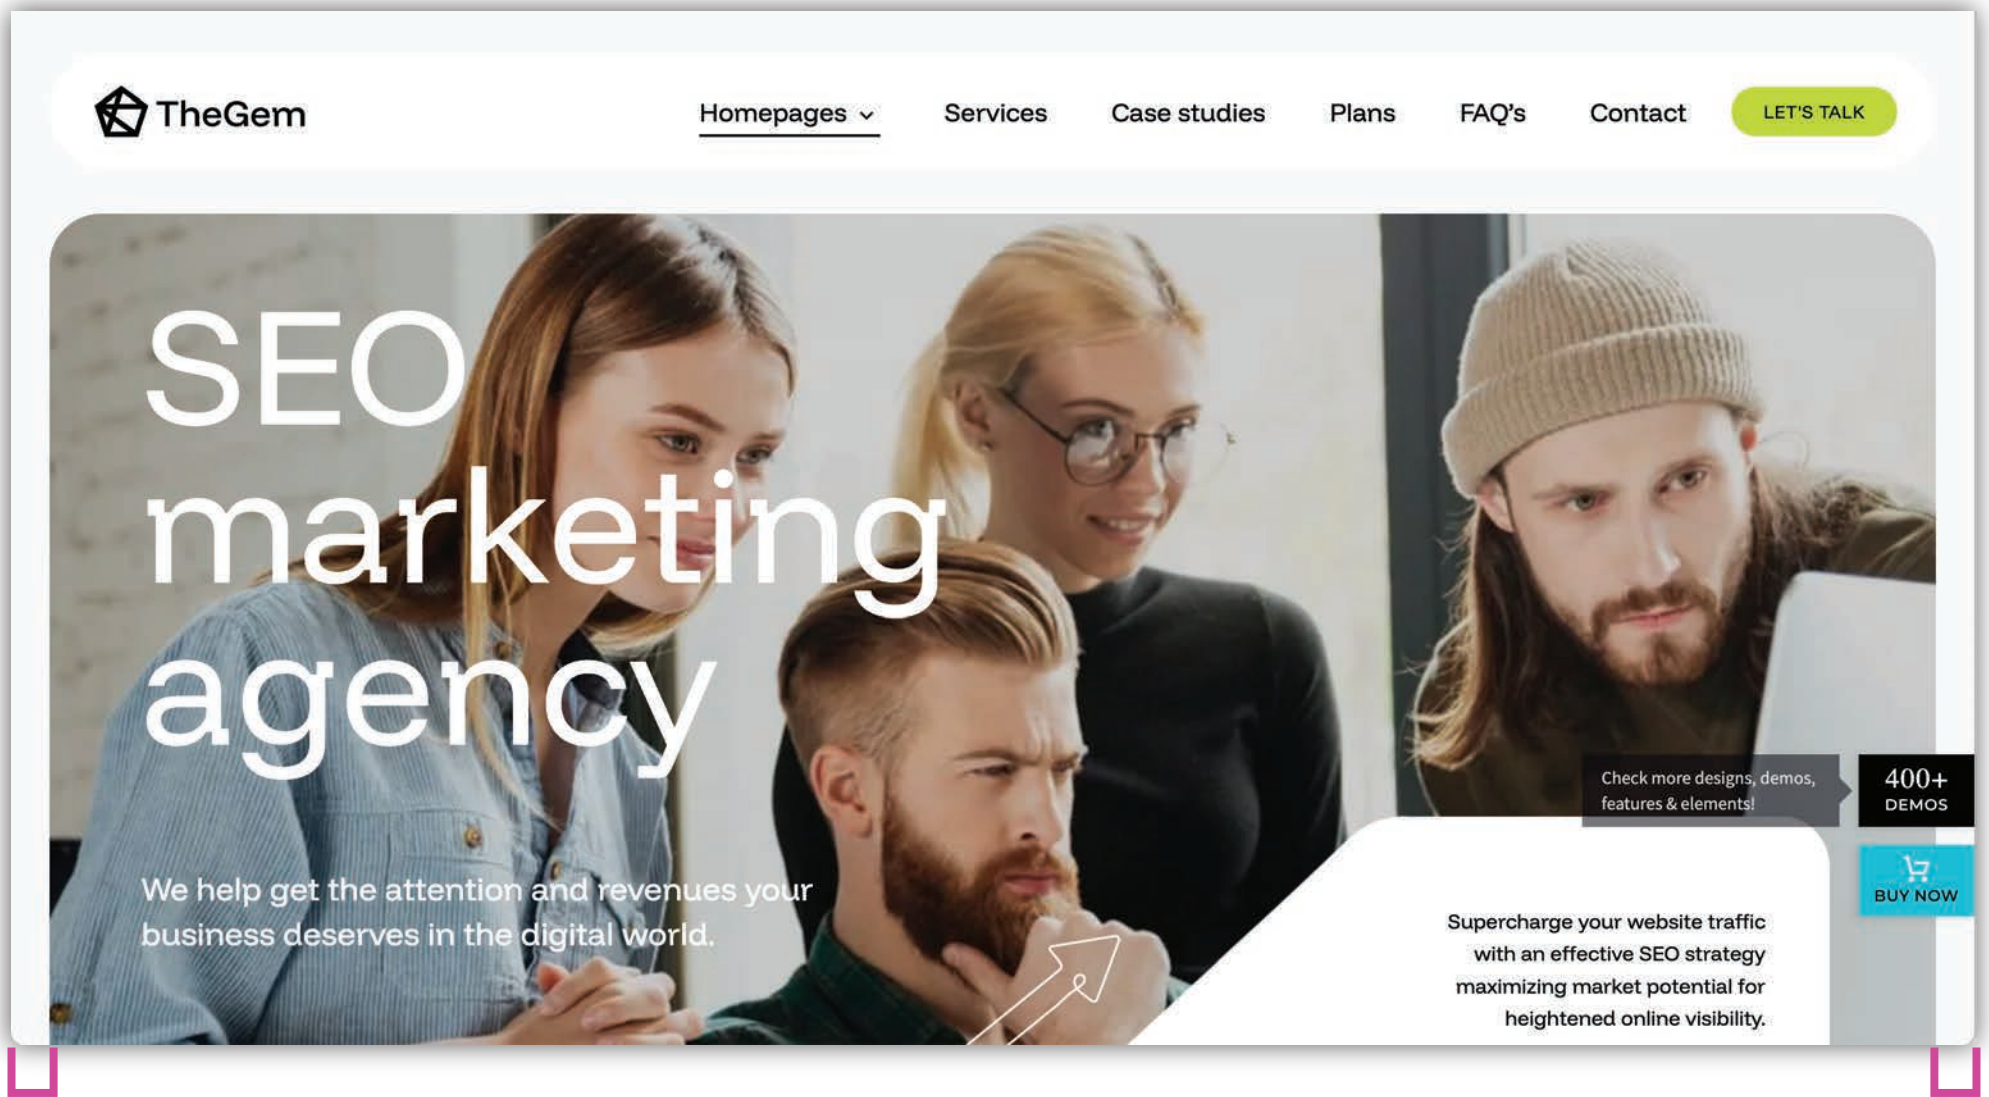

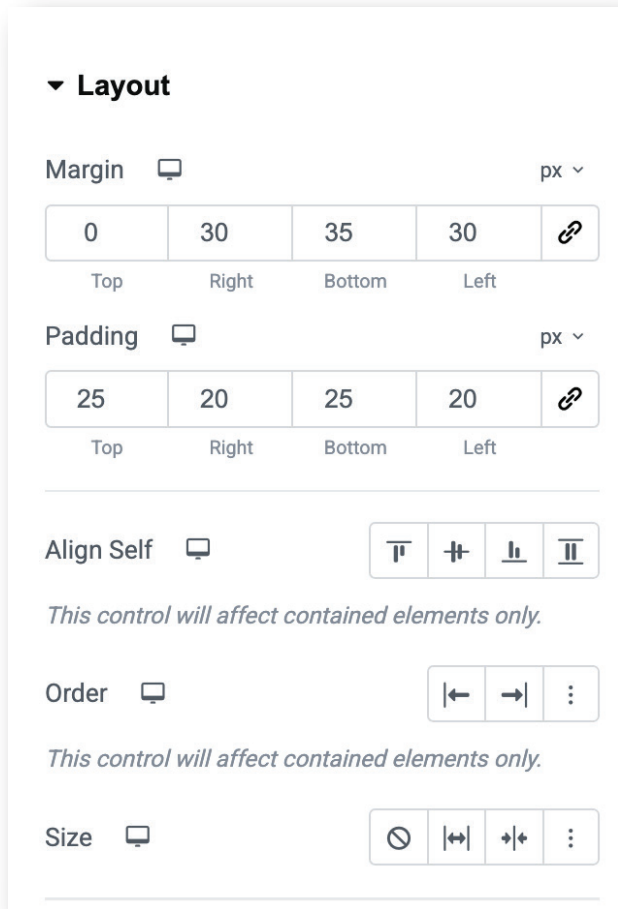

I DO NOT want to use these setting in Theme Settings because I want to have the flexibilty to have margins AND have sections that are full width.

THE GEM: SEO Agency Light

SO, I put ALL of the LEFT/RIGHT margins in Theme Settings to 0. And have attempted to adjust those within each page. HOWEVER, when I do that, one margin will not activate in the way I want it to. AND the HERO image is bing forced to full width no matt ther setting I put it in.

The page below, and how the site currently sits, looks like the image below with the settings on the left.

The Padding is GOOD. The margins are where I am having problems.

There is no space
with these setting

NO SPACING
This DOES NOT
LOOK GOOD

SPACIING
This looks good

SPACIING

NO SPACING

The Header and the Hero Image will not stay with in the margins when I have it in "full width" w/ 30pts on the Left/Right side.

They won't come in when I have it in "boxed" mode either.

I want to the ability to have full with sections with areas that have margins on the sides.

So areas on this page will work. Some will not. The top of the page where the hero is will not adjust

this blue section in the footer is pushed to the right. WHY???
